

41 Week Visit

At this visit we will measure the fundal height (the size of the baby) and check your baby's heartbeat. Be sure to write any questions down on a piece of paper and bring it to the visit.

At 41 weeks you are overdue and we will generally recommend inducing labor at this point.

* Please review to patient education videos at www.youtube.com/allianceobgyn **prior** to calling the on call physician or the office regarding questions during pregnancy, these will answer the majority of questions.
