

### 32 Week Visit

The physician will perform another ultrasound. This ultrasound is not routinely performed by most Ob/Gyn practices. This ultrasound is to ensure normal growth. Our practice does not bill nor get paid for this ultrasound. Although we will attempt to get a 4-D picture for you, the baby may be in a poor position to obtain a good picture. If this is the case the sonogram will not be repeated. There is no additional charge to you for this ultrasound.

Please make sure your phone does not have privacy directory or call block. If you have a medical emergency, and the doctor is calling from a phone with an unlisted number, then he won't be able to return your call. The answering service will inform you to proceed to the emergency room without the doctor being able to speak to you.

Sharp pains in the abdomen and groin are very common at this point. They are more common with sudden movements. The ligaments that hold the uterus in place stretch as the baby grows and causes the pain. It is completely normal.

\* Please review the patient education videos at [www.youtube.com/allianceobgyn](http://www.youtube.com/allianceobgyn) **prior** to calling the on-call physician or the office regarding questions during pregnancy, these will answer the majority of questions.

**\*\*The physicians of Alliance Ob/Gyn are on call for obstetrical and gynecological emergencies only. Calls for non ob/gyn related problems including colds, flu or other primary care related issues should be made to your primary care doctor. General questions about pregnancy, including what drugs can be used in pregnancy are available on our website. Calls for non-emergent issues will not be returned. Please address all non-emergent issues by calling the office during our regular business hours of 7:30am-4:30pm Monday- Thursday and 7:30am-2:00pm on Friday.**
