

39 Week Visit

At this visit we will measure the fundal height (the size of the baby) and check your baby's heartbeat. Be sure to write any questions down on a piece of paper and bring it to the visit. We may also perform a vaginal examination to see if your cervix has dilated.

Please make sure your phone doesn't have privacy directory or call block. If you have a medical emergency, and the doctor is calling from a phone with an unlisted number, then he won't be able to return your call. The answering service will inform you to proceed to the emergency room without the doctor being able to speak to you.

*Please review the patient education videos at www.youtube.com/allianceobgyn prior to calling the on-call physician or the office regarding questions during pregnancy, these will answer the majority of questions.

****The physicians of Alliance Ob/Gyn are on call for obstetrical and gynecological emergencies only. Calls for non ob/gyn related problems including colds, flu or other primary care related issues should be made to your primary care doctor. General questions about pregnancy, including what drugs can be used in pregnancy are available on our website. Calls for non-emergent issues will not be returned. Please address all non-emergent issues by calling the office during our regular business hours of 7:30am-4:30pm Monday- Thursday and 7:30am-2:00pm on Friday.**
